

The All-in-one Language Learning App from eKidz.eu

Differentiated and individual reading, listening, speaking and writing at school and at home!

Language progress regardless of student's mother tongue

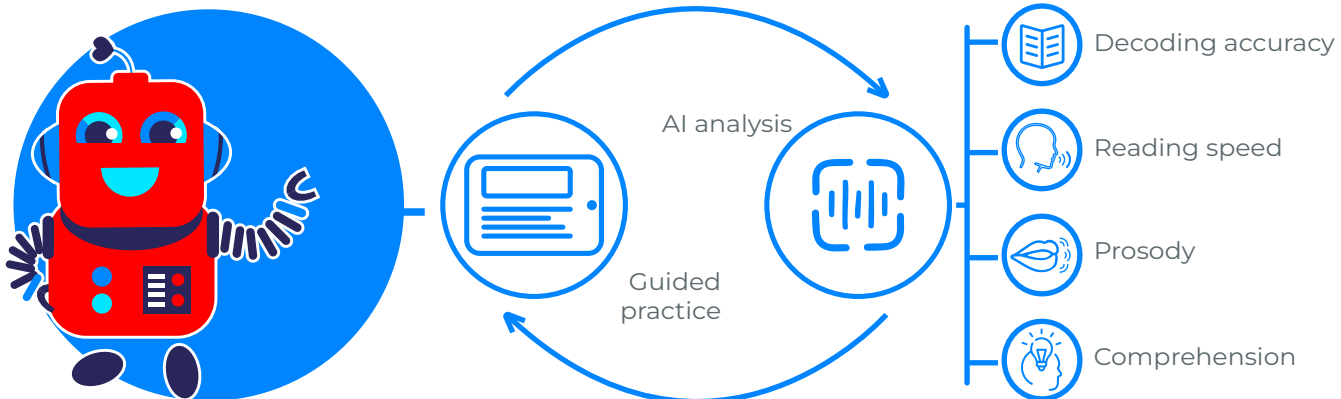

eKidz.eu texts can be read and simultaneously listened to. Narration speed is adapted to the student's reading level and spoken by native, professional voice actors who model correct pronunciation.

Students benefit greatly from listening, speaking and practising their new language at homes where the target language is not understood or spoken. In fact, there is nothing to stop the adults and siblings from learning along with them!

eKidz incorporates the complete instructional cycle

A scaffolded literacy support program works in sync with an automated progress monitoring tool. AI-technology regularly performs a formative voice recording analysis and determines the next steps in the literacy support program. Teachers also have instant access to all data and have the option to make additional modifications to the learning trajectory based on their personal knowledge about each student. For instance, an ML learner can be assigned to multiple language tracks on the app.

Recording function:

- improves reading fluency
- increases motivation
- practise pronunciation

Students, parents and teachers LOVE our new recording function. It serves as a tool to motivate, practise pronunciation, improve fluency as well as a record of reading progress for teachers to assess, reward and intervene.

This means **new creative possibilities for productive text work** (radio plays, setting the text to music, meaningful reading). Together with the new view options, this makes great opportunities to create varied, inspiring and imaginative lessons.

Snapshot of 5 fantastic eKidz app features :

- ✓ Professional native speaking narration function
- ✓ Read-along option (highlighting text karaoke style)
- ✓ Recording function
- ✓ Various viewing options (image only, text only, text+image)
- ✓ Comprehension questions

On all operating systems: native app for iOS and Android; web app in the browser

info@ekidz.eu

The program offers

- Individual and differentiated reading support in primary school grades
- Especially for beginners
- Over 50+ exciting structured texts over 11 reading levels
- Professional narration with word highlighting in karaoke format
- Comprehension assessment with immediate result and progress reporting

Record and monitor student performance level

eKidz.eu makes it easier for parents and teachers to track their student's progress and performance level. Children can share their recordings of reading aloud and story retelling with teachers and parents. eKidz.eu uses both information retrieval, knowledge-based and inference questions to assess student's comprehension at the end of each text. Results are shared real time and in-app with teachers and parents. This information allows teachers to promptly assess and intervene in the learning process.

Creative teaching ideas

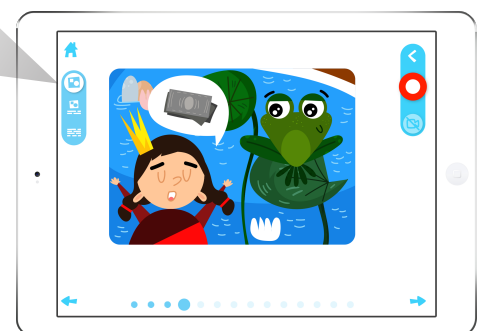

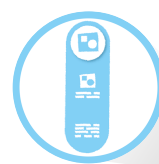

Tasks with the "image-only option"

Reduce reading inhibition: Explain the pictures.

Assess text comprehension: Use the images as prompts to retell the story.

Creative use: Use the pictures as a cue to write your own story.

Pictures with the narration function: Listening comprehension trains and promotes concentration.

On all operating systems: native app for iOS and Android; web app in the browser
