

The All-in-one Language Learning App from eKidz.eu

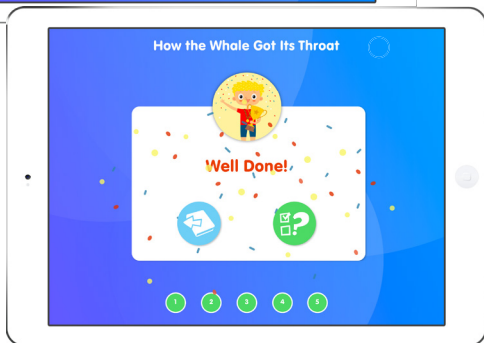

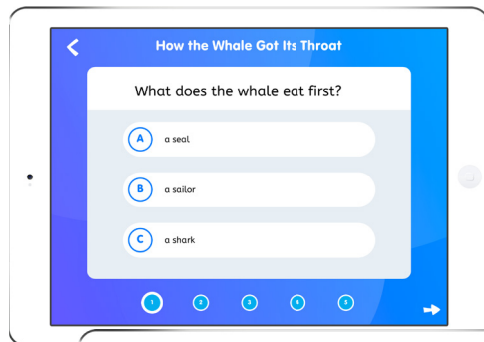

Differentiated and individual reading, listening, speaking and writing at school and at home!

Language progress regardless of student's mother tongue

eKidz.eu texts can be read and simultaneously listened to. Narration speed is adapted to the student's reading level and spoken by native, professional voice actors who model correct pronunciation.

Students benefit greatly from listening, speaking and practising their new language at homes where the target language is not understood or spoken. In fact, there is nothing to stop the adults and siblings from learning along with them!

Contents and functionalities have been didactically developed. The fiction and non-fiction texts are based on common curriculum content and vocabulary is drawn from age-appropriate and high frequency recommended word lists.

Record and monitor student performance level

eKidz.eu makes it easier for parents and teachers to track their student's progress and performance level. Children can share their recordings of reading aloud and story retelling with teachers and parents. eKidz.eu uses both information retrieval, knowledge-based and inference questions to assess student's comprehension at the end of each text. Results are shared real time and in-app with teachers and parents. This information allows teachers to promptly assess and intervene in the learning process.

Snapshot of 5 fantastic eKidz app features :

- ✓ Professional native speaking narration function
- ✓ Read-along option (highlighting text karaoke style)
- ✓ Recording function
- ✓ Various viewing options (image only, text only, text + image)
- ✓ Comprehension questions

NEW! Recording function:

- improves reading fluency
- increases motivation
- practise pronunciation

Students, parents and teachers LOVE our new recording function. It serves as a tool to motivate, practise pronunciation, improve fluency as well as a record of reading progress for teachers to assess, reward and intervene.

This means **new creative possibilities for productive text work** (radio plays, setting the text to music, meaningful reading). Together with the new view options, this makes great opportunities to create varied, inspiring and imaginative lessons.

The program offers

- Individual and differentiated reading support in primary school grades
- Especially for beginners
- Over 50 exciting structured texts over 9 reading levels
- Professional narration with word highlighting in karaoke format
- Comprehension assessment with immediate result and progress reporting
- Easy access from home for students and teachers
- School and class management system
- DSGVO-compliant and secure handling of data
- Foreign languages offered: German and Spanish

Creative teaching ideas

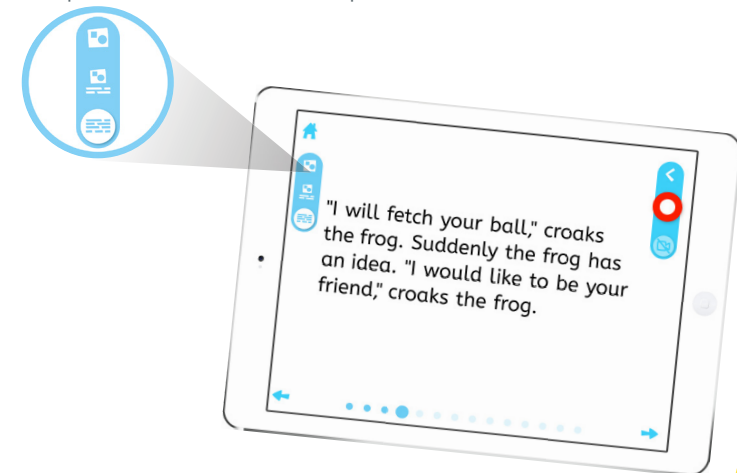

Tasks with the "image-only option"

Reduce reading inhibition: Explain the pictures.

Assess text comprehension: Use the images as prompts to retell the story.

Creative use: Use the pictures as a cue to write your own story.

Pictures with the narration function: Listening comprehension trains and promotes concentration.

Tasks with the "text-only option"

Practice reading fluency: without images and with full focus on the text.

Create your own pictures: draw pictures that go with the text to create your own comic book.

Picture-text comprehension: use the text to put the images in the correct order.
